DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2 and 4-5 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically disclose an elliptical polarizer comprising, in particular, a stress-blocking layer having a thickness of 0.3 μm or greater and 40 μm or less and a glass transition temperature (T_g) of 20 $^{\circ}\text{C}$ or higher. According to the arguments, which have been found to be persuasive, the temperature ranges described in the Kiyoyasu reference do not teach or suggest a glass transition temperature, but rather describes test conditions used to evaluate samples. Furthermore, the Madokoro reference fails to remedy the deficiency of the Kiyoyasu reference and provide no teaching of suggestion of a stress-blocking layer having a glass transition temperature (T_g) of 20 $^{\circ}\text{C}$ or higher and a thickness of 0.3 μm or greater and 40 μm or less. As a result, allowance is proper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
